

SUPPLEMENTAL DATA

Appendix Table 1. Effect of calorie restriction on white blood cells*

| Variable (time) | Treatment Group | | p-value ‡ |
|--|-----------------|-----------------|-----------|
| | CR | AL | |
| Total monocytes ($10^3/\mu\text{L}$) | | | |
| Baseline | 0.33 (0.01) | 0.32 (0.01) | |
| Mo. 12 | 0.32 (0.01) | 0.37 (0.01) † | 0.004 |
| Mo. 24 | 0.32 (0.01) | 0.35 (0.01) † | 0.034 |
| Total Neutrophils ($10^3/\mu\text{L}$) | | | |
| Baseline | 3.68 (0.11) | 3.60 (0.13) | |
| Mo. 12 | 3.41 (0.12) † | 3.71 (0.16) | 0.106 |
| Mo. 24 | 3.24 (0.10) † | 3.54 (0.14) | 0.067 |
| Total Eosinophils ($10^3/\mu\text{L}$) | | | |
| Baseline | 0.14 (0.01) | 0.11 (0.01) | |
| Mo. 12 | 0.14 (0.01) | 0.12 (0.01) | 0.095 |
| Mo. 24 | 0.13 (0.01) | 0.15 (0.01) | 0.102 |
| Total Basophils ($10^3/\mu\text{L}$) | | | |
| Baseline | 0.01 (0.001) | 0.02 (0.002) | |
| Mo. 12 | 0.021 (0.002) † | 0.025 (0.002) † | 0.378 |
| Mo. 24 | 0.020 (0.002) † | 0.024 (0.002) † | 0.443 |

* Results are mean (SE) and reflect predicted values at months 12 and 24 based on intention-to-treat (ITT) statistical analysis, p-values reflect the ITT analyses for changes from baseline at each time point.

† Significantly different from baseline within the same treatment group.

‡ Values reflect difference in change from baseline between treatment groups at each time point.

Appendix Table 2. Effect of calorie restriction on antibody response to Hepatitis A, Tetanus/Diphtheria and Pneumococcal vaccines

| | Median (IQR)* | | | % with detectable values | | |

* Total number of distinct episodes summed across participants in that treatment arm.
 † The total number of days during which the event was prevalent across participants in that treatment arm, divided by the number of participants in that treatment group.
 ‡ Total number of distinct events divided by the total amount of follow-up time in that treatment arm, standardized to 365 days in a calendar year.
 § The p-value is derived from the Poisson regression model comparing the number of distinct episodes between the two groups.

Appendix Table 3B. Distribution of the Severity of the Events, Pooled Across all Events Among Participants Who Experienced the Event at Least Once

| Event | AL (N=75) | | | | CR (N=143) | | | |
