

SUPPLEMENTARY FIGURES

Supplementary Figure 1. (A) The K-M survival curves are plotted to predict the DFS of TCGA patients. (B–E) The expression of 14-3-3σ in PAAD tissues in patients with different T (B), N (C), M (D) stages, and sex (E).

Supplementary Figure 2. (A) The protein and mRNA levels of 14-3-3σ in AsPC-1 cells with 14-3-3σ-shRNA were detected by immunoblotting (A, B) and qPCR (C).
